

Star Clusters: the Gaia Revolution

Contribution ID: **61**

Type: **not specified**

Poster talk

Thursday, 7 October 2021 12:50 (20 minutes)

Hektor Monteiro - Updating the DAML02 catalog using Gaia data

Verena Furnkranz - Pearls on a String: Numerous Stellar Clusters Strung along the Same Orbit

Elisa Rita Garro - Physical characterization of recently discovered globular clusters in the Sagittarius dwarf spheroidal galaxy II. Metallicities, ages and luminosities

Andrew Pace - The Nature of the Fornax 6 Globular Cluster with Magellan/M2FS Spectroscopy

Carlos Roman-Zuñiga - The Perseus Anomaly: Expansion of Cluster Complexes

Lorenzo Spina - The radial metallicity gradient: achievements and future challenges

Khyati Malhan - A dwarf galaxy stream populating the inner Milky Way halo

Session Classification: Clusters as tracers of the Galactic structure and history
