

Star Clusters: the Gaia Revolution

Wednesday, 6 October 2021

Stellar evolution and aster seismology (09:00 - 10:50)

time	[id] title	presenter
09:00	[38] Testing stellar evolution in clusters using asteroseismology and Gaia	MIGLIO, Andrea
09:30	[39] Using Asteroseismology to Measure Masses of Evolved Stars in M4 to Study Stellar Evolution and Globular Cluster Formation	HOWELL, Madeline
09:45	[40] Constraining the chemical enrichment of M22 from AGB stars using magnesium isotopic ratios	MCKENZIE, Madeleine
10:00	[41] Precise asteroseismic ages from pulsating pre-main-sequence stars	MURPHY, Simon
10:15	[42] TESS asteroseismology and the search for Galactic chemical clocks	BOULET, Thibault
10:30	[43] Poster talk
