

Anomalies in flavour physics

Monday, 7 February 2022 10:50 (25 minutes)

Over the last few years there have been various measurements where the Standard Model fails to agree with experiment.

I will attempt to give a summary of the different places where the disagreements occur, why we do (or why not) these are believable signs of physics beyond the Standard Model, and what the current results can tell us about how to go beyond the Standard Model.
