

## **Development of instrumentation at the Technology Unit: Science and beyond**

*Tuesday, 8 February 2022 16:40 (25 minutes)*

The Technological Unit of the ICCUB is actually providing several currently groups of ICCUB with services, such as instrumentation and software development, in order to support their contributions to international collaborations. Many developments on instrumentation are related to sensitive photosensor readout technology with key contributions in international projects as LHCb, CTA, HERD and IAXO. Furthermore, this technology is also being applied in medical imaging technology in cooperation with academic and industrial partners.

**Presenters:** PICATOSTE OLLOQUI, Eduardo (ICCUB); GASCON FORA, David (ICCUB. Universitat de Barcelona)
