

First Announcement, 6th Barcelona Techno Week: Scientific Computing in the Cloud 29thMay – 2nd June 2023, Barcelona

The [Institute of Cosmos Sciences of the University of Barcelona](#) (ICCUB) announces the 6th edition of its Technoweek workshops. The workshop is devoted to the use of the Cloud for scientific computing, and will be held at the premises of the ICCUB in Barcelona from May 29th to June 2nd 2023.

The Technoweek will be a hybrid event, with 40 places for on-site participation and 100 places for remote participation. It will include talks on Cloud technology and tools and several Cloud use cases from different disciplines. The on-site version will include three hands-on workshops using the main Cloud providers: Google Cloud, Microsoft Azure and Amazon Web Services. Instructors from each of these providers will guide the activities. The remote version will provide basic access to these Cloud services for independent learning.

General information and the list of talks and contributors can be found [here](#).

[Registration](#) for in-person participation is open until the 22nd May. Online participants can [register](#) until the start of the Techno Week. Fees:

	Until 28 th February	Later registration
On-site participation (includes social dinner)	275€	350€
Remote participation	75€	100€

We are looking forward to seeing you in Barcelona!
