Educational resources for a better world

Monday, 28 November 2022 19:00 (1 hour)

Are you involved in astronomy education or outreach and looking for new ways to talk about the unique perspective of astronomy on our planet? We are all astronomy educators who love to bring an astronomical perspective to our view of Earth, emphasize that there is no Planet B, and empower Earthlings to take care of our one and only home. We have found some interesting resources and activities that work well, but we are always looking for new ideas. If you'd like to share with us, or you're interested in hearing what others are doing, please join our workshop. We will begin by sharing our own favorite resources and activities, and there will be plenty of time for other participants to discuss and share their own favorite resources. We are working to compile these on the A4E website, too, and will go over how to navigate the resources we've already posted.

Join this workshop via Zoom: <https://SDSU.zoom.us/j/84581477570>

Presenters: HURST, Anna; OCAÑA FLAQUER, Breezy; HIRST BERNHARDT, Christine; BOLDUC-DUVAL, Julie (Discover the Universe / Dunlap Institute); WILLIAMSON, Kathryn

Session Classification: Workshop
