INTERSTELLAR GRAINS IN MUSEUMS?

A. G. W. CAMERON

Belfer Graduate School of Science, Yeshiva University, New York, N.Y., U.S.A.

and

Goddard Institute for Space Studies, NASA, New York, N.Y., U.S.A.

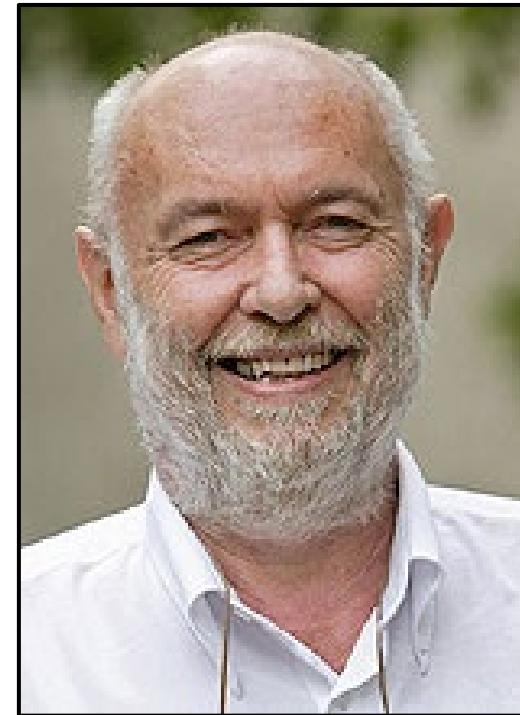

“During this conference there have been many discussions of methods for determining the properties of interstellar grains by means of electromagnetic observations and by investigation of the properties of possible laboratory prototypes. It has not been realized that it may be possible to study interstellar grains directly within the laboratory” (1973)
